

## JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road expedition.

Whilst on their trip, John spent time talking to former business acquaintances whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a vast market for a product that could promptly and safely lift individuals in the air to accomplish maintenance and other construction services.

Upon returning from their travels, John formed a joint venture with two friends and acquired a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they designed and sold the first JLG aerial work platform. The business incorporates some of the simple design elements of that original lift into current designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fateful cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into many different global markets and continues to develop contemporary machines to guarantee that consumers are able to become safer and more well-organized within their workplace.
