

Concrete Hoppers

Concrete Hopper - The self-dumping hopper attachment can automatically start to both unload and release as soon as the bumper release touches the side of a dumpster. As soon as dumping is finished, the hopper can return to original upright and locked position. This piece of equipment is even presented along with a cable which allows operation from the seat of the lift truck in order to have the option of manually unloading the hopper. There is a locking chain provided to be able to lock the hopper to the tine truck. This product is constructed with reliable and consistent robotic welds for maximum strength. The lift truck dumping hopper also has a blue powder coat finish to be able to maintain durability.
